WHERE THE MARKET MEETS

EARSC ANNUAL ASSEMBLY

Brussels | 20th & 21st of June

Description:

Shaping EO services market for research (powered by OCRE): This workshop aims to bring the earth observation service providers closer to the research community, listen to their needs and develop fit for purpose EO services.

Local & Regional Authorities Workshop: Given that local and regional authorities have specific needs and requirements regarding EO based services concerning for instance the compliance with EU Directives or the slow uptake of space solutions, EARSC – on the initiative of Marc Tondriaux – has decided to start a new local authorities working group.

The objective of the WG will be to create cooperative front-end/back-end partnerships between EO companies to reach more effectively otherwise distant local and regional institutions. Should you be interested to be part of this WG and/or have solutions to propose to be considered by this WG, please join us!

Small Companies Forum (SCF): The forum is open to companies with less than 25 employees. Small companies were asked which topics they would like to addresses and it was agreed that the themes would be digitalisation and how to transform your pre-commercial product into a commercial product. It has been confirmed that we will have a presentation from the European Commission (DC CONNECT) and presentations from different large EO companies, sharing their experience and giving tips.

EARSC 30 Years Anniversary Cocktail and Award Ceremony: It is time to celebrate all that EARSC has accomplished for the past 30 years! We invite you all to join us in the Museum of Natural Sciences (Rue Vautier 29, 1000 Brussels: <https://www.naturalsciences.be/>). It will be the biggest Cocktail party EARSC has ever organised full of surprises!

EARSC Annual General Meeting: EARSC members will have an overview of EARSC activities in 2018 and what are EARSC's future plans. EARSC members will also vote for their representatives, EARSC Directors.

“A Day with EO” Conference: EO is taking a bigger part in our daily lives, but how well do you know the impact on your life? Join us in discovering different areas of your life that are being transformed thank to EO. Representatives from different sector will come together and exchange with you about their needs.
